

NAME: Hooman Mostofi, B. Sc., MBA
Hooman.Mostofi@gmail.com

ROLES: C-Change Research Associate
Master of System Science, University of Ottawa

DISCIPLINES:

KEYWORDS: Multicriteria Decision Making, Vulnerability Measures, Adaptation

RESEARCH INTERESTS:

My research interests are the evaluation of adaptive capacity of coastal communities that are vulnerable to rapidly changing environmental conditions mainly storm surges and sea level rise and evaluation of community's options for adaptation.

Moreover I am interested in developing a methodological framework that can provide decision making support applicable to various coastal and small island contexts.

BIOGRAPHY:

I received my B.Sc in industrial engineering in 2002 from Azad University of Tehran. After two years working in IT industry as a programmer and analyst, I shifted my career toward oil and gas industry. I worked as a contractor for Shell Development Iran and also been part of environmental impact assessment study for a gas pipeline project.

In 2006 I moved to Malaysia to pursue my studies and I received my MBA certificate in 2008 from MMU University. I decided to move to Canada in 2009 and I am currently enrolled in M.Sc of System science in University of Ottawa.
