

NAME: Kathy Cunningham, B.Sc., B.Ed. , OCT
Cunningham@telfer.uottawa.ca

ROLES: C-Change Administrator
OMRN Coordinator

DISCIPLINES: Aquatic Resources, Biology, Education

KEYWORDS:

BIOGRAPHY:

Kathy attended St. Francis Xavier University from 1997 to 2001, earning a B.Sc. in Aquatic Resources and Biology. Research for her senior project involved invasive species, namely the Green Crab, *Carcinus maenas*, and its presence and abundance along the eastern coast of Nova Scotia and Cape Breton. Kathy has also earned her Bachelor of Education degree from the University of Ottawa, graduating in June of 2011.

Kathy's work experience includes positions with the Guysborough County Inshore Fishermen's Association and the Department of Fisheries and Oceans, located at the Bedford Institute of Oceanography in Dartmouth, Nova Scotia, working on population studies regarding offshore clams on Banquereau, Sable and the Grand Banks. Hailing from L'Ardoise, Cape Breton, only a stone's throw from the C-Change community of Isle Madame, Kathy is very excited to be involved with the project.
